01 Session / evidence summary

One parent MYELIN session. Study is the shared context for off-task recovery (SECANT) and approved-break return (COSECANT).

Session scope

Finalized means the recorder has committed its final flush. It does not certify that every child record is valid. Excluded and unavailable evidence is disclosed separately.

02 SECANT / study recovery

A verified-return event is not a recovered episode. Episode closure alone is not recovery. Behavioral evidence_gap is distinct from recorder recording loss.

08 Evidence quality / reading notes

This is read-only behavioral software evidence. It makes no neurological, clinical, attention or cognitive claims.

Title not recorded: absent title metadata. Not recorded: an optional fact was never captured. No data: a readable scope contains no applicable records. Unavailable: required evidence is unreadable or invalid.

Finalized recording does not imply complete sensing. Supported foreground spans contain only supported observations; gaps are not filled.

Native identities and proof tokens remain internal provenance. Human-facing SEC and COSEC aliases are the existing persisted presentation identities.

Evidence snapshot fingerprint: 32053b3e5d1d2f18993ef636d37fc47e031806765326f0845d91c885b9431bcc
