01 Session / evidence summary

One parent MYELIN session. Study is the shared context for off-task recovery (SECANT) and approved-break return (COSECANT).

Session scope

Field	Recorded value	Field	Recorded value
Parent MYELIN session	204	Started	28 Sep 2026 02:52:26

Study visits	5		

Finalized means the recorder has committed its final flush. It does not certify that every child record is valid. Excluded and unavailable evidence is disclosed separately.

02 SECANT / study recovery

A verified-return event is not a recovered episode. Episode closure alone is not recovery. Behavioral evidence_gap is distinct from recorder recording loss.

06 COSECANT / approved-break return

Completed allowance means its deadline was reached. Confirmed return requires the validated same-break proof chain. No recorded confirmation does not mean failed return.

No data

07 Evidence quality / reading notes

This is read-only behavioral software evidence. It makes no neurological, clinical, attention or cognitive claims.

Title not recorded: absent title metadata. Not recorded: an optional fact was never captured. No data: a readable scope contains no applicable records. Unavailable: required evidence is unreadable or invalid.

Finalized recording does not imply complete sensing. Supported foreground spans contain only supported observations; gaps are not filled.

Native identities and proof tokens remain internal provenance. Human-facing SEC and COSEC aliases are the existing persisted presentation identities.

Rendering substitutions: unsupported characters were shown as ?. Original evidence was not changed. Code points: U+2615
