COSINE
STREAMING BEHAVIOR REPORT

Choice-Oriented Streaming Insight and Navigation Engine

Generated: 10 Sep 2026 - 21:19:58 [India Standard Time]
Data Scope: Latest COSINE Durable Evidence
Latest completed episode: COS-08092026-03

01 OVERVIEW

The analysed database snapshot contains 21 captured COSINE episodes. 4 contain a recorded return confirmation and 5 contain a recorded break start. Usual Return remains UNAVAILABLE because its Phase-2 definition is not certified.

COSINE observes supported OTT streaming behaviour and records factual interaction, user-choice, platform-transition, break and return evidence. It regulates streaming through explicit choice-oriented interventions while preserving durable event evidence for later analysis.

CAPTURED EPISODES	CONFIRMED RETURNS	BREAK STARTS	LATEST COMPLETED
21	4	5	COS-08092026-03

02 EPISODES

Episode IDs use the UTC episode-start date; displayed dates and times use the selected report time zone.

Showing 8 most recent of 21 captured episodes.

EPISODE	DATE	PLATFORM	CHOICE	HOPPER	OUTCOME
COS-08092026-03	08 Sep 2026	Prime Video	No choice recorded	0	Incomplete
COS-08092026-02	08 Sep 2026	Prime Video	Intentional break - 45 min	0	Study pre-emption
COS-08092026-01	08 Sep 2026	Prime Video	No choice recorded	1	Incomplete
COS-07092026-03	07 Sep 2026	Prime Video	Return intention -> converted - 120 min break	0	Incomplete
COS-07092026-02	07 Sep 2026	Prime Video	No choice recorded	0	Incomplete
COS-07092026-01	07 Sep 2026	Prime Video	Return intention	0	Incomplete
COS-06092026-01	07 Sep 2026	Prime Video	No choice recorded	0	Incomplete
COS-05092026-05	05 Sep 2026	Prime Video	No choice recorded	0	Incomplete

03 INTENT

EPISODE	PLATFORM	RECORDED CHOICE	OUTCOME
COS-08092026-03	Prime Video	No choice recorded	Incomplete
COS-08092026-02	Prime Video	Intentional break - 45 min	Study pre-emption
COS-08092026-01	Prime Video	No choice recorded	Incomplete
COS-07092026-03	Prime Video	Return intention -> converted - 120 min break	Incomplete

Intent records represent explicit durable user-choice events captured by COSINE. A later conversion from return intention to break is reported only when a corresponding conversion event exists; it is not inferred from elapsed time or final outcome.

04 RETURN

Episode COS-03092026-01

Return candidate started -> **Final callback hidden for focus** -> **Return verification completed** -> **Closure confirmation started** -> **Return confirmed**

This episode contains a return candidate followed by completed verification and recorded return confirmation.

05 HOPPER

Showing 8 most recent of 21 captured episodes.

Observed platform transitions recorded within each episode. Hopper is a chronology of switches, not a causal or effectiveness measure.

EPISODE	START PLATFORM	PLATFORM PATH	SWITCHES	OUTCOME
COS-08092026-03	Prime Video	Prime Video	0	Incomplete
COS-08092026-02	Prime Video	Prime Video	0	Study pre-emption
COS-08092026-01	Prime Video	Prime Video -> Netflix	1	Incomplete
COS-07092026-03	Prime Video	Prime Video	0	Incomplete
COS-07092026-02	Prime Video	Prime Video	0	Incomplete
COS-07092026-01	Prime Video	Prime Video	0	Incomplete
COS-06092026-01	Prime Video	Prime Video	0	Incomplete
COS-05092026-05	Prime Video	Prime Video	0	Incomplete

Recent completed Hopper path - Episode COS-08092026-01

Prime Video -> Netflix

06 EVIDENCE

Episode COS-08092026-03 - 2 key milestones shown - 4 total recorded events

SEQ	TIME	EVENT	CLASS	PLATFORM	EVIDENCE
1	20:09:33	Episode started	Observed	Prime Video	-
4	20:09:53	Episode closed	Derived	Prime Video	Session stopped - Incomplete

07 ABOUT COSINE

COSINE

CHOICE-ORIENTED STREAMING INSIGHT AND NAVIGATION ENGINE

COSINE records supported OTT streaming episodes and the user's explicit responses to streaming interventions. It preserves durable evidence of streaming activity, user choices, platform movement, breaks and return.

IT OBSERVES
Streaming -> Check-in -> Choice -> Platform movement -> Break / Return

HOPPER EFFECT
Records factual movement between supported streaming platforms during one COSINE episode.

SCIENTIFIC BOUNDARY
Observable software behavior only. COSINE does not directly measure attention, emotion, motivation, health, dopamine, cognition, brain activity or psychological state.
